

I do not want to see LPFM replace the current FM Translator system. Specifically, The radio station my family and I listen to almost exclusively is K-LOVE which uses FM translators extensively. K-LOVE provides my community a breath of fresh air in radio with it's Christian content and music. As a non-commercial, listener supported station it is very important to me that K-LOVE remain as it is with regard to it's format. I am very concerned about what kind of content may replace K-LOVE if an LPFM station replaced my local stations.

Thank you.
